 Hello, ProUser!

ProUser espresso Portable Espresso Machine ensures all the coffee lovers can experience true espresso freedom by making and enjoying their favorite espresso grind whenever and wherever they are.

ProUser espresso is the first and only cordless portable espresso machine that can have energy efficient water boiling which is powered by a **removable tailored designed tools lithium battery**, operate from one button and automatically pump as well as pour your espresso straight into the detachable, **BPA free** and **transparent** drinking cup (Tritan).

Portable Espresso Machine

CAA100

ProUser espresso Portable Espresso Machine is the first automatic cordless portable espresso machine that employs tools battery and multi-heating elements to provide adequate, stable and efficient power during your journey! So whether you are traveling, on an adventure, working or at home, you can now enjoy a fresh, perfectly extracted espresso with a thick rich cream automatically made for you at the simple push of a button!

- Consistently produces a fresh espresso every use
- Fully automated – operates from one button and automatically pumps for you
- Can boil water anywhere you go or directly pour water at any temperature
- Cordless – ultimate portability
- Make an espresso from every Nespresso® capsule or your own espresso grind on your terms
- Pours espresso directly into detachable drinking cup

User friendly

For the first use

1. Unscrew the drinking cup and water lid then clean the drinking cup, capsule cap and the water tank with a soft sponge, water and detergent.
 2. Put them back when they are dried.
- *Remove the sticker from the battery before you want to charge it.**

Charging via AC ADAPTOR

Connect the AC adaptor with the machine and plug it into the mains powers supply, Charging time: Around 2-3 hours.

Charging via 12V car charger

Connect the 12V charger with the machine and plug it into the cigar lighter, Charging time: Around 2-3 hours.

Charging via USB-C charger (Charging only)

Connect the charger with the machine and plug it into the mains power supply, Charging time: Around 6-8 hours.

Coffee making preparation

3. Turn the machine upside down and unscrew the drinking cup and capsule cap.
4. Put a capsule into the capsule insert and press it down until flat.
5. Screw and tighten the capsule cap and drinking cup.
6. Turn the machine right side up then unscrew the water lid.
7. Pour water to the max level mark.
8. Screw the water lid back onto the machine. It is now ready for you to make the coffee.

Making the coffee

9. Room temperature water to be boiled: Hold the button for 2 seconds, indicator will flash with beep sound and heating logo would be shown at the LED display.
10. After a few minutes, you would enjoy the hot espresso with crema.
